TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, C
- **Frontend:** React.js, Next.js, Angular, Redux, HTML, CSS, Sass, Figma, Adobe XD
- **Backend:** Node.js, Express.js, FastAPI, SQLAlchemy, Alembic
- **Databases:** MySQL, PostgreSQL, MongoDB
- **DevOps & Cloud:** Docker, AWS (S3, CloudWatch, ECS), GitLab CI/CD, Git
- **Testing:** Pytest, Cypress, Playwright, Jasmine

WORK EXPERIENCE

SIEMENS

Software Developer - Working Student

Berlin, Germany
JULY 2024 – Present

- Contributed to the frontend development of a factory orders quality assurance application being piloted across 10 Siemens factories globally, including two in Germany.
- Refactored a legacy frontend codebase into a domain-driven architecture, improving maintainability through structured state management, and utilized an internal MCP server to upgrade libraries and outdated code.
- Developed the frontend and contributed to the backend of a document management system for factory machines, with dashboards for machine and department hierarchies, improving access to operating and safety documents.
- Implemented multiprocessing in a FastAPI server wrapping a factory inventory simulation model, enabling parallel simulation runs across multiple CPU cores and achieving a 4x speedup in execution time.
- Designed database schemas, implemented migrations while preserving legacy data, strengthened reliability across applications through comprehensive testing, and reduced CI build times through Docker layer caching.

Solana Labs

Software Engineering Fellow

USA (remote)
SEP 2022 – DEC 2022

- Selected as one of the 90 developers globally to attend the MLH fellowship program.
- During the fellowship period, worked with Solana Labs and contributed to the main [Solana blockchain explorer](#) web application.
- Enhanced user experience of the web application by presenting information about inactive accounts, improved UI, resolved open-source bugs reported by the community and displayed complex nested data structures of Solana blockchain programs on the frontend.

EDUCATION

Brandenburg University of Technology

M.Sc. in Artificial Intelligence - Expected Graduation: January 2027

Cottbus, Germany
APR 2024 - Present

Coursework: Data Mining, Explainable ML, Computing at Scale with ML, Statistics

Jamia Hamdard University

B.Tech. in Computer Science Engineering

New Delhi, India
AUG 2019 – JUN 2023

Coursework: Data Structures, Design, and Analysis of Algorithms, Operating Systems, DBMS

PROJECTS

Schedule-e-Hamdard | [GitHub](#) | TypeScript, React.js, Node.js, MongoDB, Express

- A role-based class scheduling platform for staff, teachers, and students, enabling efficient class assignments and session tracking.

Mollify | [GitHub](#) | React.js, Node.js, MongoDB, Express, Socket.io, PeerJS

- A web application connecting psychiatrists with patients for home, virtual, and clinic sessions, featuring scheduling, navigation, messaging, and video communication for users.

AWARDS AND ACHIEVEMENTS

MLH Orientation Hackathon: My team made an NFT minting web application ([GitHub](#)) which got selected as one of the top 3 projects.

Solved 500+ problems on LeetCode ([Profile](#)).
